

# Positron Access has been named a finalist for the prestigious Glotel Awards 2023

We are thrilled to share that Positron Access has been named a finalist for the prestigious Glotel Awards 2023, recognizing our commitment to innovation in the telecommunications industry. The winners will be unveiled during a Gala Event in London, UK on the evening of November 30th. The Glotel Awards honour the dedication, ingenuity, and forward-thinking initiatives that are shaping the future of telecommunications on a global scale.

Our G.hn GAM (Gigabit Access Multiplexer) technology enables carriers to deliver Gigabit services efficiently over telephone wires or coax cables in buildings without in-building fiber wiring. This non-disruptive solution eliminates the need for costly rewiring, saving up to 80% in costs.
